Short, fun, challenging.

Need a second part :3. It's kinda like if you mixed Metroid with Myst. I like it.. Interesting little puzzle platformer. Only 4-5 hours long.. Dont remember playing it, probs really♥♥♥♥♥. I really liked it! The puzzles were varied, and the platforming was very execution heavy, but I enjoyed figuring it out. And I got good enough at it that I could complete all the challenges. I liked the settings, the atmosphere, and I even enjoyed the ending. I especially liked the little cut scene dreams between each challenge.. Normally I'm all over anything involving Niffias, but this one has some really obtuse interfaces and obnoxious controls.. 8/10

Olen sairas.. Bing Bong, good game.. Not my cup of tea. You wander around planets hoping you photographed things you then use to solve puzzles. There are 25 ways to go each planet and its the classic zelda "you need to right right first to get this which you then use to backtrack and go right, once you have these 2 things you should know you need to travel to a different planet and go right 3 areas and down left, use these on that, go back left 5 areas and so on." You have to go in a specific order and collect things and its just no intuitive. Platforming is good but its more about randomly exploring planets with an intangible purpose. Most of the time you don't have any idea exactly where to go or what to do. I prefer to not wander around aimlessly, although so many derps call that "atmosphere, and beauty". I call it dumb. If what I described is for you then feel free. The controls are also bad. 4.5/10. Not surprised its free.

Pros:

- Stunning atmosphere
- Exceedingly difficult puzzles
- Fluid Movement
- touching story

Cons:

- Where's the second episode?. This game has such a great atmosphere to it. I have never played such a laid-back yet puzzle-oriented and intriguing platformer. If you've played Nicklas Nygren's other games, it is similar, but even more puzzle-oriented than his other works. As usual, the experimental soundtrack is excellent and fits the ambience of the worlds perfectly. This game is not for everyone, but be sure to at least try the demo. It may surprise you.. Not as good as his other games, but still, it's Nifflas. This game is pretty great. Wonderful platforming (especially with a gamepad, configuration software required), and some really devilish puzzles. The atmosphere is beautiful, with colorful backgrounds and spacey ambient sound and music. Developed by the creator of Knytt Stories.. A newer game that's still typical of Nifflas' work. Has a bit of everything - a world map, platforming, some plot, puzzles that act as roadblocks, and, for some reason, the ability to take pictures. Some of the photography and puzzle mechanics seem a bit out of place, but it's still both goergous and kind of tricky. Short, but worth it.. Saira really surprised me. I always liked Nifflas' games, but well - I dare say this is his best yet. Solid platforming, clever and unique puzzles (often with multiple solutions), an interesting universe and story and the usually beautiful art and music.

If you're a fan of exploration-heavy games, don't hesitate to get this.. Nifflas makes some amazing platformers that rival the quality of Super Meat Boy; get on it, homodog: DL this and Nightsky and Within a Deep Forest and the Knytt games.. very good game. surprised it is free. ive bought many games i didnt enjoy as much as this. the game is challanging and relaxing at the same time. i would totally wear a Saira t-shirt. for some reason it makes me think of 'beyond good and evil', because of the taking pictures i think.
