Fun, short, unique game. Definitely worth it on sale.. What a grim and dark plot for such a cute frog! Play as a frog named Glenn, as you swim into the depths of the water until you reach the bottom, finding waves of bubbles, frogs that need oxygen, as well as some u2026 pretty messed-up looking monsters, all concluded with a final boss. Saving your froggie friends proves to be a very high priority, as there is an achievement for saving all frogs, as well as reducing the chances of more monster spawns. Gathering oxygen is also a higher priority, as it saves you, other frogs and destroys several enemies. The overall difficulty of the game ranges from Easy-to-medium. There are only 3 types of enemies you have to overcome, and the boss is basically slowly dying as long as you stay alive in the final wave to the end. Simple AWSD for movement and Space key to dash. There is a lack of options and settings to adjust the gameplay experience, but that does not seem to be a big issue here. The graphics are rendered fine, and the tutorial during the intro of the game is transparent enough for the player to understand. The art was baffling. From the surface of the water, all the way to the depth of the ocean, you watch as the underwater environment changes, from a natural ecosystem, to a toxic waste. The near end gave me shivers, as I saw more and more grotesque-looking figures and monsters. The game's thumbnail definitely presented the gist of the game. Very simple animation and effects are included whether you are dashing, swallowing bubbles or being hit by monsters and your health declines. A brown frog, is a dying frog, indeed. As stated initially, They Breathe is a cute yet grim game about survival in an ecosystem consisting of Frogs. Plus, Oxygen. I remember Markiplier also having played this game, which piqued my interest, besides my love for adorable frogs. The game itself is only about 0.50\$ on-sale now, so, I would recommend trying They Breathe.. They Breathe is a game that's more of an artistic experience with underlying meaning than something to just play through. As a frog living in a dying ecosystem it's your task to dive below the surface and discover just what is killing all the other frogs, and attempt to save your home. Not all is as it seems from the surface, and the terrors below won't be easily stopped. What looks at first to be just a pond with dying frogs slowly reveals itself as a flooded forest with an underground cave, blocked by ravenous jellyfish that steal the oxygen from frogs they come across, going so far as to absorb the deoxygenated frogs into their bodies. Oversaturate them with air bubbles to burst them apart and progress downward into their source to discover just what happened to the once peaceful forest. From a gameplay standpoint, They Breathe feels a lot like a mobile game in the best ways. With minimalistic controls and simple combat it's easy to beat but provides a challenge to get all the achievements available. Visually, the atmosphere goes from bright and vibrant at the surface starting point of the game to muted and dark toward the end. The mounting sense of dread that occurs just off the visuals alone almost make They Breathe feel like a horror game, without outright being scary. The use of color to show when the frogs start to run out of air and tell the difference between the poison and regular enemies is very clear and stands out even in a literal sea of blue, brown and green colors. Nothing is quite so jarring as dying for the first time and being dragged to the depths, or watching red blood bubbles float to the surface. For a short game about ecosystems and the underlying dread of discovery, They Breathe is very well done and lives up to the \$2 price tag. It takes about 20 minutes to complete the game once, but can be replayable for hours in order to accomplish all the achievements. For those who enjoy short stylized indie games that feel more like an existential experience than a game, They Breathe is a must-have.. "Hold on a sec, are those.aaaaaaaaAAAAAAAAAAAAHHHHH!!!"
